

TechnoBox-3

Unique 3-in-1 Shading, Drapery and Lighting System
By TechnoShade

TechnoBox-3 is a high-end multi-purpose shading cassette system designed to fit three different systems in one:

- One Motorized roller blind
- One Motorized roman blind
- One LED light

It is supposed to fit two shading systems to manage natural light and one LED light to control artificial lighting.

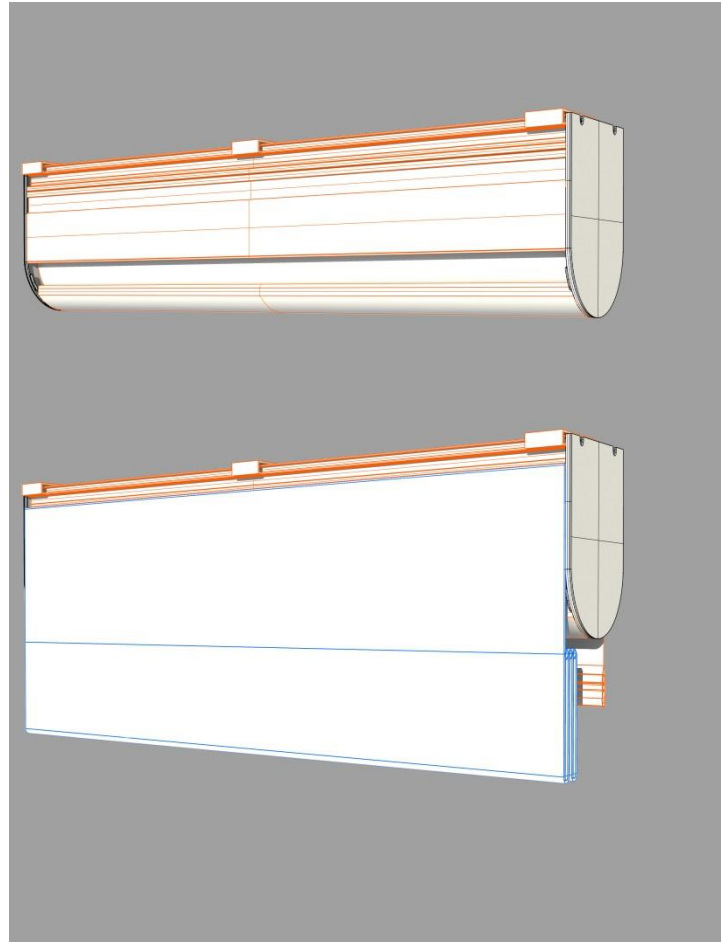

Smart Window Solutions for Sustainable Architecture

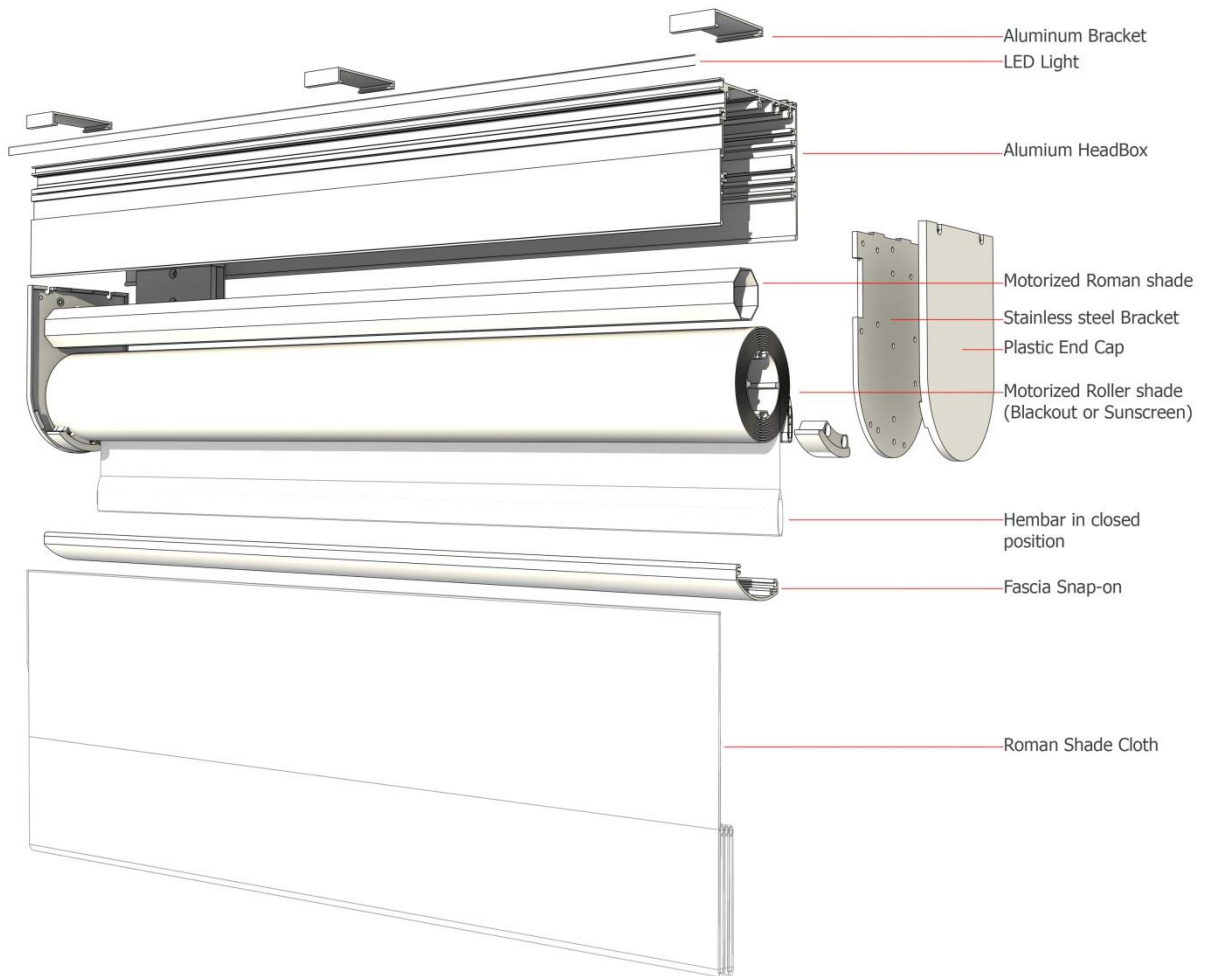

TechnoBox-3

Main features

- Compact, designed with a minimal profile that can fit in any pocket size. Three different products combined in one minimal design box within a 14cm wide box
- One power output:
The three systems will operate once the user plugs the output cable thanks to the built in electronic module that manages the three products separately.
- Easy to install and easy to program, it is a plug & play system that only needs one power output.
- Multi-product box:
This is the only box in the market that can provide, light filtering blinds, + decorative roman blind + indirect LED light.
- Remote control:
One remote control to operate the three products

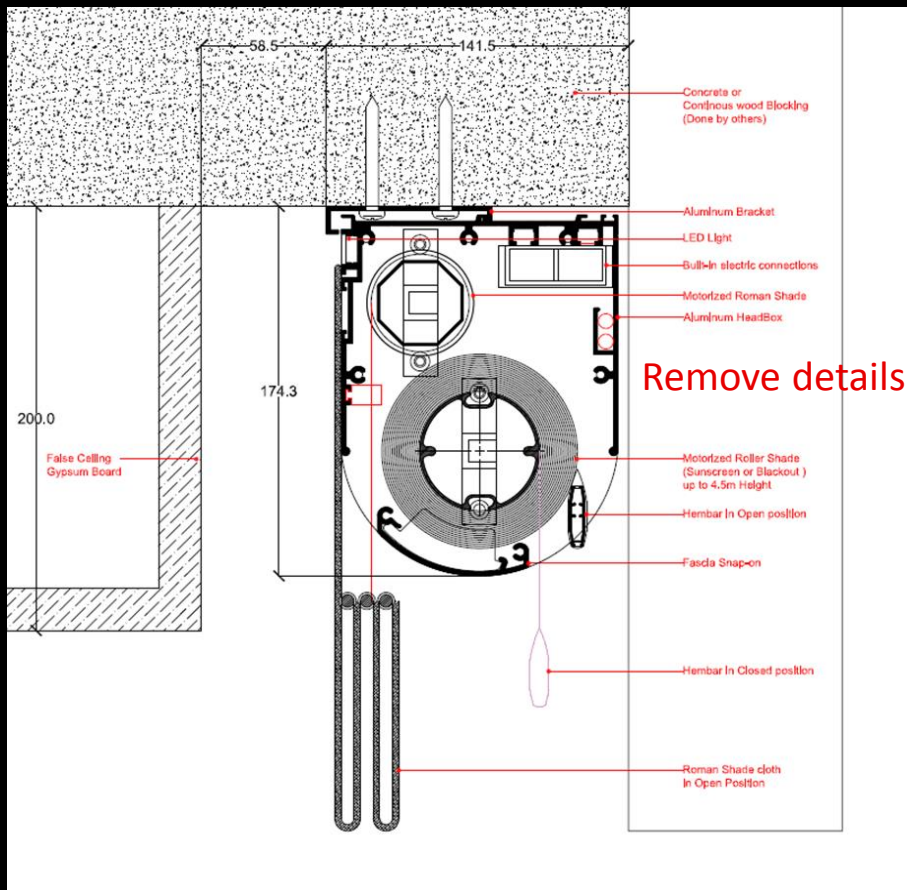

TechnoBox-3

A unique 3 in 1 high end shading and lighting system. The two blinds are fixed to a stainless steel brackets set, all covered by a solid aluminum head box designed to fit both motorized blinds and integrate an LED strip, + power supply + wires connecting box.

Once assembled the TechnoBox-3 can be fixed to a wall or ceiling bracket within the pocket depending on site situation.

TechnoBox-3

TechnoBox-3 is designed with a minimal profile that can fit in any pocket size.
